---

## BRIEF BACKGROUND

I love to write codes, whether its HTML codes, or Java codes. I like to learn new things, and improve my current skills. I like working on scalability, reusability, performance, and great user experience.

As a developer, I write codes that conforms to industrial standards and semantic best practices.

I've created a website to better express myself, do spare a few minutes to see what I am capable of! <http://bit.ly/peterleonardwebsite>

---
